WORK EXPERIENCE

Orderify (Samos, Greece)
Developer
August 2015 – Ongoing

Orderify is an application designed for every kind of Restaurant, Cafe or Bar that gives to the owner, waiters and even the customers the opportunity to send their own orders. Its main advantage is the fact that the owner can customize their application's menu the way they prefer without occupying the developers and changing the applications backend. Furthermore, the owner has full remote access to their establishment's functions and statistics giving them the ability to control everything from everywhere and at any given time.

VR-Hunt (St. Gallen, Switzerland)
Owner & Developer
March 2017

VR-Hunt is a game we designed that combines 1 Steering Wheel device, 2 VR devices, both provided by Logitech, and as many mobile devices as the server host wishes to include in his game. The concept is two main players using the Steering Wheel and the VR devices to drive and shoot from a car and the other players trying to shoot at the main ones from their mobile devices.
▪ **2nd Place at the Game Development Challenge by Logitech at START Hack 2017**
~ ~

Emergy (Athens, Greece)
Owner & Developer
May 2017

Emergy is a cross-platform application (Android, iOS, Windows Phone) that everyone can use to send instantly to the appropriate service (Police Department, Hospital, Fire Department) a signal containing their current position in case of an emergency at an unknown location.
